

*Here a Tuck,
There a Tuck!*

In case you haven't noticed the large equipment around the church, we're happy to let you know that the tuckpointing for this beautiful structure is now well underway. In order to ensure that all the renovations and improvements done to the interior of the church during our last campaign are protected, this work was necessary. Why tuckpointing? Simply put, deteriorating or weakened mortar can cause moisture to break down the stone or brick masonry wall and cause moisture problems behind it. When tuckpointing is done properly, it provides a relatively waterproof mortar joint that extends the life of the wall...thereby extending the life of our church.

This is the last of the three main campus projects covered by our *Foundations of Faith* campaign. Now, with only \$222,000 needed to reach our campaign goal of \$2.25 million, it is more important than ever to successfully complete this fundraising effort. Have you offered your financial support yet? If not, please consider doing so today – on behalf of our church and the founding parishioners who sacrificed so much to provide such a magnificent building.

*Please mark me/us down for a three-year pledge or gift (circle one) in support of our **Foundations of Faith** campaign in the amount of \$ _____ beginning in _____ (month).*
